# Media Gateway

## Seamless VoIP Connectivity, Simplified.

AEGIS XNTEL VoIP Media Gateway provides reliable and high-quality voice connectivity between traditional telephone lines and IP-based communication networks, ensuring seamless and cost-effective communication.

Web-based Management | Call-Back | Call-Detail | Back-up and Restore | Fire-Wall | Conference | Easy Management | Reliable Performance

AEGIS XNTEL VoIP Media Gateway is an advanced communication solution designed to seamlessly connect traditional telephony systems with modern IP networks. It enables smooth voice transmission between analog, digital, and VoIP networks with high voice clarity, reliability, and security. Ideal for enterprises, call centers, telecom operators, and industrial communication systems, the gateway ensures cost-effective communication, easy integration, and stable performance for unified voice connectivity.

## FXS VOIP MEDIA GATEWAY - UCM200-0S

AEGIS XNTEL FXS VoIP Media Gateway is a reliable and high-performance communication solution designed to connect analog telephones, intercoms, fax machines, and PBX systems to modern IP-based VoIP networks. The gateway supports flexible integration with IP PBX and SIP servers, providing cost--effective and scalable unified communication.

Benefits:

- Supports multiple FXS ports for analog phone connectivity
- SIP protocol compatible with major IP PBX and softswitch platforms
- Crystal clear HD voice quality with advanced echo cancellation
- Easy web-based configuration and remote management & IP PBX Systems
- Supports fax over IP (T.38 & Pass-through)
- Caller ID, Call Transfer, Call Forwarding & Conference support
- Strong security with firewall and access control support
- Stable and reliable operation for 24x7 communication
- Compact industrial design with low power consumption
- Configuration : 2/4/8/16/24/32/48/72/96/120/144 Ports

## FXO VOIP MEDIA GATEWAY - UCM200-0O

AEGIS FXO VoIP Media Gateway is an advanced communication device designed to connect traditional PSTN telephone lines with modern IP-based VoIP networks. It allows businesses to integrate existing telecom infrastructure with IP PBX systems, enabling cost-effective voice communication, flexible call routing, and seamless connectivity. The gateway delivers stable performance, superior voice quality, and reliable operation for offices, call centers, enterprises, and telecom environments.

**Benefits:**

- Supports multiple FXO ports for PSTN line connectivity
- SIP protocol compatible with major IP PBX and softswitch platforms
- High-quality voice communication with echo cancellation and jitter buffering
- Easy web-based configuration and remote management
- Supports incoming and outgoing call routing through VoIP networks
- Caller ID detection and polarity reversal support
- Flexible dial plans and intelligent routing options
- Fax support with T.38 and Pass-through
- Strong security protection and stable 24x7 performance
- Configuration : 4/8/16/32 Ports

# E1 VOIP MEDIA GATEWAY - UCM300D-E1

AEGIS E1 VoIP Media Gateway is a high-performance telecom solution designed to connect SIP E1/PRI digital lines with PBX System. It enables seamless integration between traditional telecom infrastructure and SIP/IP communication systems, making it ideal for telecom operators, enterprises, call centers, ISPs, and unified communication environments. The gateway delivers carrier-grade voice quality, high reliability, flexible routing, and cost-effective communication management.

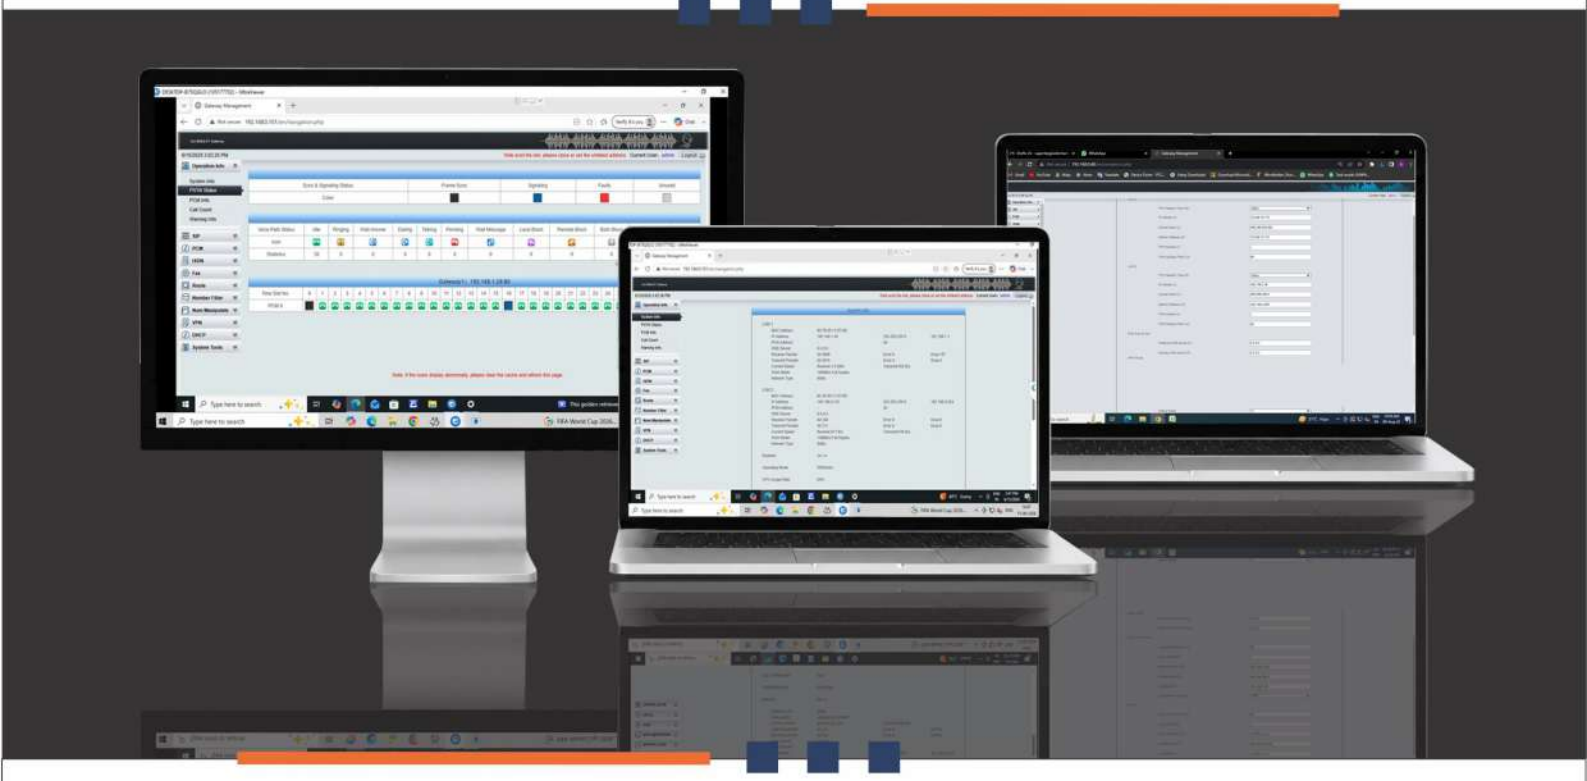

**Benefits:**

- Supports E1/PRI digital trunk connectivity
- SIP protocol compatible with major PBX and softswitch platforms
- Carrier-grade voice quality with advanced echo cancellation and jitter buffering
- Supports PRI, SS7, R2, and SIP signaling protocols
- High call handling capacity for enterprise and telecom applications
- Intelligent call routing and least cost routing (LCR) support
- Web-based configuration and remote management
- Fax support with T.38 and Pass-through
- Configuration : 1/2/4 E1 Lines

# HYBRID FXS + FXO VOIP MEDIA GATEWAY - UCM200-DH

AEGIS Hybrid FXS + FXO VoIP Media Gateway is a versatile communication solution designed to connect both analog telephone devices and PSTN lines with modern IP-based VoIP networks. By combining FXS and FXO interfaces in a single device, it enables seamless integration of traditional telephony systems with IP PBX and SIP-based communication platforms. The gateway delivers superior voice quality, flexible deployment, reliable performance, and cost-effective unified communication for enterprises, hotels, hospitals, call centers, and telecom applications.

**Benefits:**

- Combination of FXS and FXO ports in one gateway
- Connect analog phones, fax machines, and PSTN lines simultaneously
- SIP protocol compatible with major IP PBX and softswitch platforms
- HD voice quality with advanced echo cancellation and jitter buffering
- Flexible call routing between PSTN and VoIP networks
- Supports Caller ID, Call Transfer, Call Forwarding & Conference
- Fax support with T.38 and Pass-through
- Easy web-based configuration and remote management
- Strong security protection and stable 24x7 operation
- Configuration : 2+2/4+4/8+8/16+16 Ports

# Aegis Informatics Pvt. Ltd.

**Aegis Informatics Pvt. Ltd**. is a telecommunications technology company based in Noida, Delhi NCR, India, founded in 2008. The company specializes in manufacturing and supplying voice logging solutions, telephone call recording systems, Sim Base communication products and VoIP Communication solution and Range of products for businesses and government organizations.

## Become a Channel Partner

### What we provide to our Channel Partners:

- Unlimited Support
- Online Product Demonstration facility to channel Partners and their clients
- Product Training to channel partners team as and when require
- Compatible Product (Analog, Digital,IP,GSM)
- Constant Software Upgrades and Development
- Scalable Solution For Every Application
- Customize solution as per customer need
- Discount levels are available and are determined by Channel Partner's active participation and Sales Volume and More
